

EasyFlow Datasheet

A strong, easily-assembled modular drainage system, EasyFlow is a lightweight yet robust solution, with an A15 load-bearing capacity. Flow velocity and the self-cleansing capability of the channel enabled by its efficient design and it's suitable for a wide variety of applications. The system is also eco-friendly, being manufactured from recycled plastics and 100% recyclable at end of use.

110mm adaptor - fits outlets of the main body and the endcaps

Endcap with knockout

4-way connector with knockout in base to fit a 110mm pipe

10 year guarantee

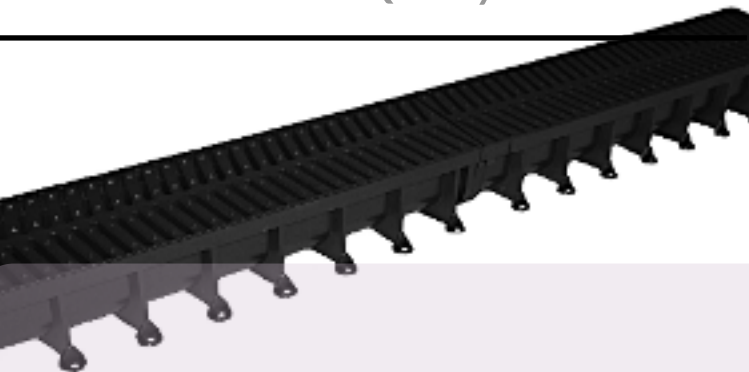

FEATURES

Size: 1000x125x78mm. The system is comprised of x2 500mm long pieces, reducing cutting requirement. Should the system need to be cut, this can easily be done with a jigsaw

Selection of adaptors and other accessories; adaptor converts outlet to 110mm pipe

8 knockouts per metre

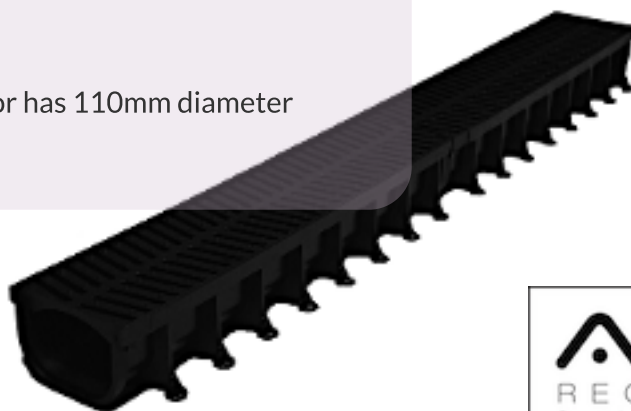

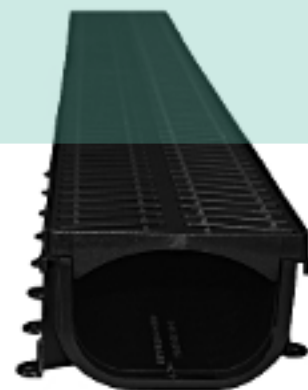

Made to **ISO9001** Quality Standards

Feet to help levelling and offer added support; reduces floating if the channel is being set in concrete or mortar

No tools needed to assemble, but a hammer required to remove knockouts

Vertical outlet in base of 4-way connector has 110mm diameter outlet
