

EasyTrack *Portable Flooring System*

EasyTrack is a newly developed temporary or permanent flooring system suitable for both inside and outside. It is made from recycled strong polypropylene for maximum life with minimum breakages, and is also recyclable at end of use, helping you meet sustainability targets.

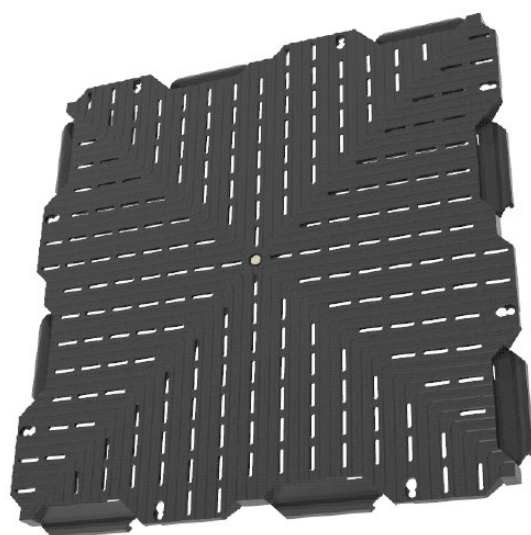

All components are lightweight yet very strong. All parts can be easily and quickly locked together to make a robust surface.

To increase strength, the components of the system can be "brickbonded".

Size: the main panel is 58x58cm and the ramp panel is 58x21cm.

Available in black and grey, with other colours made to order.

Manufactured from recycled plastic and recyclable at end of use, EasyTrack is made in the UK to ISO9001 Quality Standards

EasyTrack is ideal for:

Marquees

Outdoor festivals and concerts

Weddings and parties

Camping and other outdoor activities

Children's playground areas

Health and safety compliant flooring

Building site walkways and solid grounds

Use in the garden, to replace decking or patio, and allowing for water drainage

*Installed by Ire-Trak Ltd of
County Wexford, S.Ireland*
