

FirmGround Heavy

FEATURES

Ideal for HGV areas, truck stops, fork lift loading bays, coach parking areas and emergency vehicle routes

Channels allowing for drainage and pockets at the base for water retention, preventing waterlogging and plant death

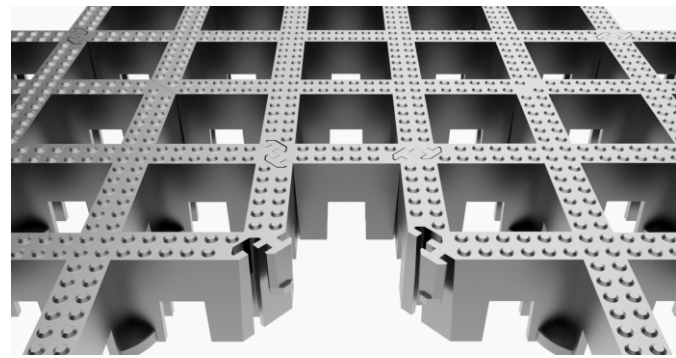

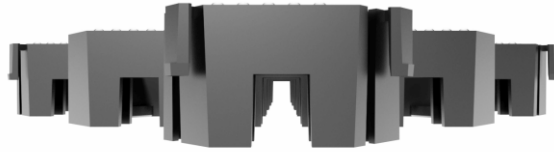

Fully compliant with SUDS regulations, they greatly reduce flooding risk by enabling the free flow of water through and around each mat

Manufactured from recycled polymers

4 mats per sqm and 80 per pallet

Each mat weighs approximately 3.9Kg

Dimensions - 500 x 500 x 80mm (+0/-3%)

Manufactured in the UK to ISO9001 Quality Standards

BENEFITS

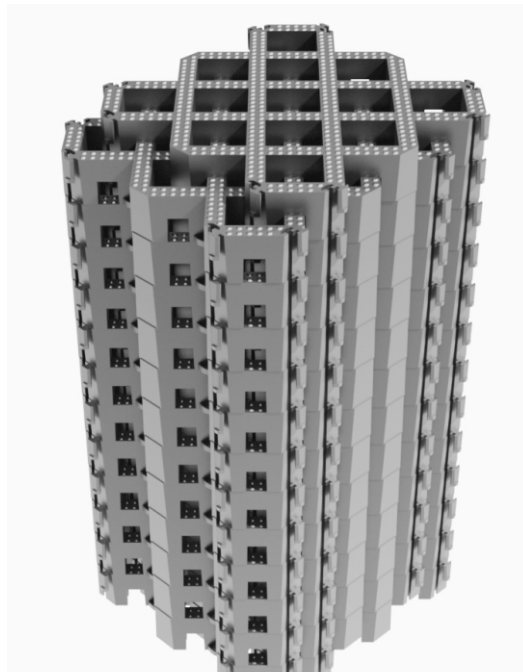

Lightweight yet durable, the grids are a superior alternative to concrete pavers and are easily handled and installed, with no special tools required

Don't need to be pegged down

They can be cut to size, using a saw

All types of gravel and grass are suitable for infill

Product can be used on slopes; it is often used on motorway embankments

Mats have integral locking clips so no separate clips are required to fix them together

Can be stacked in an interlocking fashion, reducing delivery costs and ensuring stability during transportation

Highly durable and do not become brittle in freezing conditions or high temperatures

Harmless to flora and fauna

Low maintenance - can be fit and left
