

Dry Verge System

Verge Trim, Ridge Caps & Trim Fillers

The ultimate in quality and sustainability

The range is made from recycled plastic and is recyclable at end of use, helping you meet sustainability targets.

Weathering need not be a problem. The products have excellent holding down properties, protecting tiles from wind dislodgement.

They keep the verge dry and protect against insect infestation and water ingress, while also being UV stable. Whatever the climate though, rest assured that we guarantee our products for 25 years.

THE RANGE

-Verge Trim Filler: Seals off the Verge Trim assembly at the eaves.

-Verge Trim: Repeat is adjustable, from 225 to 345mm.

-Ridge Cap: Accommodates slopes of 0-60 degrees.

The range comes in black, grey, brown and terracotta, so you will achieve the exact aesthetic desired.

PRODUCT	PRODUCT CODE	QUANTITY PER PACK

An exceptional design

The Pennine Verge Trim Range is universal, with no need for lefthanded or righthanded pieces.

Crafted from durable polypropylene, all products within the range are lightweight, robust, with a sleek, elegant finish.

The material also delivers enough flexibility for easy and rapid installation.
